Caladrius Biosciences to Host First Quarter 2018 Financial Results Conference Call on Thursday, May 10, 2018 at 4:30 p.m. Eastern Time
BASKING RIDGE, N.J. (May 3, 2018) – Caladrius Biosciences, Inc. (Nasdaq: CLBS) (“Caladrius” or the “Company”), a development-stage biopharmaceutical company with multiple technology platforms targeting autoimmune and select cardiology indications, announces that the Company will release financial results for the three months ended March 31, 2018 after close of the U.S. financial markets on Thursday, May 10, 2018.

Caladrius’ management will host a conference call for the investment community beginning at 4:30 p.m. ET on Thursday, May 10, 2018 to discuss the financial results, provide a company update and answer questions.

Shareholders and other interested parties may participate in the conference call by dialing (866) 595-8403 (domestic), or (706) 758-9979 (international), and providing conference ID: 9763239. The call will also be broadcast live on the Internet via the Company’s website at www.caladrius.com/investors/news-events.

For those unable to participate in the live conference call or webcast, a replay will be available beginning May 10, 2018 two hours after the close of the conference call. To access the replay, dial (855) 859-2056 or (404) 537-3406. The replay passcode is: 9763239.

The webcast will be archived on the Company’s website for 90 days.

About Caladrius Biosciences

Caladrius Biosciences, Inc. is a clinical stage biopharmaceutical company with multiple technology platforms targeting autoimmune and select cardiovascular indications. The Company is investigating its lead product candidate, CLBS03, an *ex vivo* expanded polyclonal T regulatory cell therapy for the treatment of recent-onset type 1 diabetes, in an ongoing Phase 2 trial. CLBS14, a CD34 cell therapy intended as a treatment for coronary microvascular dysfunction and refractory angina, is Caladrius’ proprietary and patent protected formulation of CD34 cells designed specifically to enhance the potency of the CD34 cells for repair and regeneration of cardiovascular tissue. Its companion product, CLBS12, is formulated specifically for intramuscular administration for the treatment of lower extremity ischemia. A phase 2 study of CLBS12 as a treatment for critical limb ischemia being conducted in Japan, a successful outcome of which will qualify the program for consideration of early conditional approval based on discussions with the Japanese regulatory authorities as provided for under Japan’s progressive regenerative medicine regulations.
